Carbon Reduction Plan

Net Zero by 2035

ClinLexis Ltd's commitment to Net Zero, its baseline emissions footprint, and the measures in place to reduce it.

PREPARED BY

ClinLexis Ltd · Company number 17081483

PUBLISHED

20 July 2026 · United Kingdom · Next review July 2027

SIGNED OFF BY

The board of directors, ClinLexis Ltd

Commitment to achieving Net Zero

ClinLexis Ltd is committed to achieving Net Zero emissions for its UK operations by **2035**, ahead of the UK Government's 2050 target, and to aligning with the NHS Net Zero ambitions that apply to its supply chain.

2026 Baseline year, ClinLexis's first year of trading	6.0 tCO₂e Total estimated baseline emissions	-20% Emissions-intensity reduction target by 2030	2035 Net Zero target for UK operations
---	--	---	---

Baseline emissions footprint

ClinLexis was incorporated on 10 March 2026, so the 2026 reporting year is both the baseline and the current reporting period. ClinLexis is a small, fully remote, cloud-native software company with no premises, no company vehicles and no manufacturing or physical distribution. Emissions below are estimates prepared using the UK Government greenhouse gas conversion factors for company reporting and published homeworking methodologies, and will be refined in future annual updates.

Emissions scope	Category	2026 baseline (tCO ₂ e, estimated)
Scope 1	Direct emissions (premises, vehicles)	0.0
Scope 2	Purchased electricity (no premises held)	0.0
Scope 3 (required categories)	Category 4: Upstream transportation and distribution	0.0
	Category 5: Waste generated in operations	<0.1
	Category 6: Business travel	1.5
	Category 7: Employee commuting (including homeworking)	2.4
	Category 9: Downstream transportation and distribution	0.0
Scope 3 (voluntary)	Purchased cloud computing services (AWS, eu-west-2 London)	2.0
Total estimated emissions		6.0 tCO ₂ e

Current emissions reporting

As 2026 is the first year of operation, current emissions are as stated in the baseline table above. Future publications will report current-year emissions against this baseline annually.

Emissions reduction targets

- Maintain Scope 1 and Scope 2 emissions at or near zero by remaining a remote-first company with no owned premises or vehicles.
- Reduce total emissions intensity (tCO₂e per full-time employee) by at least **20% by 2030** against the 2026 baseline.
- Achieve Net Zero for UK operations by **2035**.

Carbon reduction projects and environmental management measures

- **Remote-first operations:** no offices or commuting by default; meetings held by video call unless travel is essential.
- **Low-carbon travel policy:** rail preferred over car or air for business travel within Great Britain; travel undertaken only where remote alternatives are inadequate.
- **Efficient cloud infrastructure:** all workloads are hosted with Amazon Web Services in the London (eu-west-2) region. AWS matches its electricity consumption with 100% renewable energy purchases, and ClinLexis actively right-sizes compute, storage and model usage to minimise unnecessary processing.
- **Sustainable procurement:** preference for suppliers with published carbon reduction commitments; IT hardware purchased sparingly and used to end of serviceable life.
- **Environmental management system:** ClinLexis has adopted an environmental policy and commenced implementation of an environmental management system aligned to ISO 14001.
- **Annual review:** this plan, its estimates and its targets are reviewed and updated at least annually, with progress overseen at board level.

DECLARATION AND SIGN-OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and the associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard, and use the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors of ClinLexis Ltd.

Signed on behalf of the board:

Ahmmad Youssef, Director, ClinLexis Ltd
